

ABOUT OUR SUMMER ENRICHMENT PROGRAM

Our program offers students a dynamic blend of enrichment experiences and academic elective courses, designed to spark curiosity, build confidence, and keep learning alive all summer long. Students can explore new interests, strengthen essential skills, and engage in hands-on, interactive activities led by our dedicated staff. With opportunities for creativity, problem-solving, and academic growth, the Summer Learning Academy provides a supportive and exciting environment for every learner.

Course Catalog

(each course will be 1.5 hours, must pick 2 courses and 2 alternates)

Academic Core Classes

Core Reading: A targeted literacy program designed to support and strengthen foundational reading skills for all learners. Through small group instruction, engaging texts, and multisensory activities, students will receive guided practice in phonemic awareness, phonics, decoding, fluency, and comprehension.

Core Math: This program is designed to reinforce and strengthen essential math skills for all learners. Through hands-on activities, games, and small group instruction, students will build a strong foundation in number sense, computation and problem solving.

Core Writing : A targeted writing program designed to support and strengthen foundational writing skills for all learners. Through small group instruction, model texts, and interactive writing activities, students will receive guided practice in sentence construction, grammar and mechanics, idea development, organization, and writing stamina. Instruction focuses on helping students express their thoughts clearly and confidently across a variety of writing tasks.

Academic Elective Classes

Brain Builders-Skills to Increase Executive Function: Students strengthen essential executive function skills—organization, planning, attention, flexibility, and working memory—through hands-on challenges, games, and team activities. This course helps students build routines and strategies that support success in and out of the classroom.

Study Smart! Strategies for Success: Students learn practical tools for studying, note-taking, problem-solving, and test-taking in a fun, supportive setting. Through activities, games, and guided practice, learners build confidence and discover what strategies work best for them.

Unplugged Adventures-Games, Creativity and Play: A high-energy class where students rediscover the joy of screen-free fun! From classic board games and card challenges to team-building activities and creative problem-solving stations, students learn how to play collaboratively, think strategically, and have fun!

Challenge Across the Curriculum: Students engage in stimulating, multi-disciplinary challenges designed to stretch thinking, creativity, and problem-solving skills. This course weaves together math, reading, and critical thinking through inquiry-based activities. Perfect for curious learners who love to explore, question, and tackle complex problems across all subject areas.

Academic Elective Classes

International Cuisine-A Reading, Math & Culture Kitchen Adventure: In this flavorful elective, students will “visit” a new country each week, reading short stories or folktales from that culture, exploring themed recipes, and practicing measurement, sequencing, and math through hands-on cooking activities. Along the way, they’ll learn about world traditions, ingredients, and kitchen tools, while building reading comprehension, math fluency, and social connection—all without leaving the classroom!

Sports & Games Academy-Play, Compete, Connect! In this high-energy class, students will participate in a variety of sports, games, and physical challenges that help build athletic skills while also strengthening important social skills. Whether it’s soccer, relay races, or cooperative team-building activities, students will learn how to work together, communicate effectively, and support their peers in a fun, inclusive environment. Through friendly competition and collaboration, students will develop social skills, sportsmanship, empathy, and problem-solving skills—while building confidence in their physical abilities.
